SUEDE AI / QUALIFICATIONS

Practical AI implementation. Source-backed search work.

Jason Colapietro | Founder and CEO, Suede AI | 21 October 2026

Turn a recurring business task into a defined AI workflow, or turn unclear search visibility into a prioritized repair plan. Work with the founder who builds and operates Suede AI's agent platforms and publishes the implementation evidence.

21 course credentials / 17 Microsoft Learn training achievements
GEAR program membership recorded separately. Individual records are linked below.

01 AI workflows and MCP integrations

Deliverable. A workflow map, bounded pilot scope, tool and permission requirements, and acceptance checks.

Training. Claude Academy / Anthropic: Claude API, Claude Code, MCP, Amazon Bedrock and Google Cloud. Microsoft Learn: Azure AI Agents, Foundry IQ, Visual Studio Code, Microsoft 365 and Agent Framework. Hugging Face: Fundamentals of Agents. AWS Skill Builder: Amazon Bedrock Getting Started.

Working proof. A real MCP client discovers the Suede Creator Skills server, searches for a workflow, retrieves its instructions and checks an unknown-skill response.

02 SEO, AEO and source repair

Deliverable. A dated source review, technical checks, prioritized fixes and a repeatable follow-up plan.

Training. Semrush Academy: AI search, keyword research, on-page SEO, local SEO and digital PR. HubSpot Academy: AEO Fundamentals certification.

Working proof. Eight checks inspect the published evidence page and detect three defects introduced into a controlled copy.

03 AI answer evaluation

Deliverable. A source-backed rubric, saved test cases, failure categories and a repeatable evaluation command.

Training. IBM SkillsBuild: Craft Precise Prompts for AI Models. Google Skills: introductory generative AI and large language models. Databricks Academy: Generative AI Fundamentals accreditation.

Working proof. Eight checks evaluate four authored answer fixtures, detecting changed totals, missing sources and an unsupported relationship.
